Coordinating Agent To Agent List of efforts (CATALIST)

Birds of a Feather (BoF)

Chairs: Yingzhen Qu yingzhen.ietf@gmail.com

Adrian Farrel adrian@olddog.co.uk

ADs: Orie Steele orie@or13.io

Andy Newton andy@hxr.us

Charles Eckel eckelcu@cisco.com (incoming)

Note Well

By participating in the IETF you agree to follow IETF processes and policies. This Note Well is a reminder
of some of those policies. For a linked version of this text, please visit *www.ietf.org/note-well* or use the QR code below.

- IETF participants are expected to behave in a professional manner and extend respect and courtesy to their colleagues at all times (see *RFC 7154: IETF Guidelines for Conduct and IETF Anti-Harassment Policy*). If you have any concerns about behavior, please contact the *Ombudsteam* who have a duty of confidentiality and extensive powers to act, as set out in *RFC 7776: IETF Anti-Harassment Procedures*.
- If you are aware that any IETF contribution (as defined in *RFC 5378: Rights Contributors Provide to the IETF Trust*) is covered by patents or patent applications that are owned or controlled by you, your employer or your sponsor, you must disclose that fact, or not participate in the discussion (see *RFC 8179: Intellectual Property Rights in IETF Technology*).
- For detailed process information consult *RFC 2026: Internet Standards Process* and *RFC 2418: IETF Working Group Guidelines and Procedures* and updates to those.
- The IETF routinely makes public written, audio, video, and photographic records of IETF activities, including your personal information as set out in the *IETF Privacy Statement*.

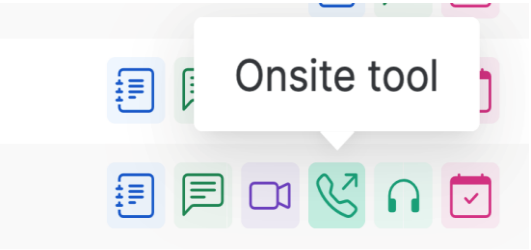
For advice, please talk to Working Group chairs or Area Directors.

Meeting Tips

This Meeting is Being Recorded

In-person participants

- Make sure to sign into the session via Datatracker or the QR Code in this session
- Use the Meetecho (usually “Meetecho lite”) client to:
  - Join the mic queue
  - Participate in shows of hands
- *Keep audio and video off if not using the onsite version*



Remote participants

- *Make sure your audio and video are off unless you are presenting or speaking at the mic*
- Use of a headset is strongly recommended.

Note-taking

- Please help to take minutes.
- Please make sure that your comments are recorded correctly.

- https://notes.ietf.org/notes-ietf-125-catalist

Administrivia

- **Blue Sheets**
  - Blue sheets will be automatically generated when you login into Meetecho
- **Zulip:**
  - https://zulip.ietf.org/#narrow/stream/125-catalist
- **Note-Taking:**
  - https://codimd.ietf.org/notes-ietf-125-catalist
- **Agenda at:**
  - https://datatracker.ietf.org/doc/agenda-125-catalist
- **Materials/Slides at:**
  - https://datatracker.ietf.org/meeting/125/session/catalist
- **Datatracker:**
  - http://datatracker.ietf.org/wg/catalist/about

CATALIST Scoping Statement

- This is not a Working Group Forming BoF
  - It does not aim to promote any specific technology
  - It is not proposing to create a working group
  - There is no draft charter
- Artificial Intelligence (AI) is a very broad topic!
  - We have a narrow focus: AI agent-to-agent communications
    - Includes agent-to-agent architectures, communication protocols, security, management, and discovery
    - Does not include:
      - Networking for AI (Net4AI)
        - Planning, operating, optimizing network infrastructure to support AI
      - AI for Networking (AI4Net)
        - Use of AI to operate or manage networks
      - AI for creating or using IETF contributions

CATALIST Objectives

- Multiple “parallel” IETF efforts (side meetings, mailing lists, I-Ds…)
  - Past, present, future
- This (non-WG-forming) BoF provides a forum to summarize and share information and pointers
  - Cannot cover all side meetings here
  - Picked main ones from previous IETFs
  - Identify what work might be done in the IETF and what IETF WGs are already doing work
  - For new activities:
    - Does the IETF have enough people to do the work?
    - Does the IETF have the expertise to do the work?

Agenda

1. Administrivia (chairs) [5 minutes]
2. Purpose of BoF (chairs/AD) [5 minutes]
3. Summary of IETF efforts and their scope [60 minutes]
   Questions should be for clarification only
   a. AI Agent Protocols
      (Cullen Jennings) [10 minutes]
   b. Network architecture for the AI ecosystem
      (Arashmid Akhavian) [10 minutes]
   c. AI Agent Discovery
      (Nic Williams) [10 minutes]
   d. AI-Agent Network Requirements and Protocols (ANP)
      (Kehan Yao) [10 minutes]
   e. Dynamic Multi-agents Secured Collaboration (DMSC)
      (Aijun Wang) [10 minutes]
   f. Agent Communication Interdomain Protocols (ACIP)
      (Toerless Eckert) [10 minutes]
4. Work outside the IETF (Suresh Krishnan) [10 minutes]
5. Open discussion [30 minutes]
6. Closing remarks and next steps (chairs and AD) [10 minutes]

Other Work At the Moment

- There is a mailing list to discuss all aspects of AI agent-to agent work
  - agent2agent@ietf.org
- Side Meetings This Week
  - There are (at least) 14 related side meetings this week
  - See the Agenda page https://sidemeetings.ietf.org
- There are many relevant I-Ds
  - Search in the Datatracker
  - Post about your I-D on the agent2agent list

Reminder About Process

- Side meetings are not a formal part of the IETF
  - They do not represent IETF work and have no standing in the IETF
  - They are not policed by the IESG
  - Anyone can schedule a side meeting on any topic
- All Areas have some form of “dispatch” function
  - A place where you can take new work ideas and get guidance
  - gendispatch, dispatch, secdispatch, intarea, rtgwg, opsawg, tsvwg
- There are already mailing lists for a number of topics
  - Most relevant is agent2agent@ietf.org
  - Look at https://datatracker.ietf.org/list/nonwg
- If you have a well-scoped topic that people want to work on:
  - Talk to your AD
  - Propose a BoF

Questions for Discussion

- What broad topics belong in the IETF scope?
- Which working groups are already active?
- Enough expertise/people in the IETF for new work?
- What coordination activity would be useful?
  - Why are existing processes not enough?
  - Would a coordination/discussion group (similar to MOPS, IoTOPS, or PQUIP) be useful?
  - Would similar future meetings be useful?
    - If we have another meeting, what should the scope be?

Closing Remarks
